

The SMuRFless CAD Clinic

Do you have coronary artery disease
but don't have these risk factors?

We welcome you to visit a specialty clinic!

The **SMuRFless CAD Clinic** was established by a global team of experts to find out why some people develop coronary artery disease (CAD) **without** having standard modifiable cardiovascular risk factors (SMuRFs) and why these people have poorer health outcomes in comparison to people with CAD who *do* have one or more SMuRFs.

Why attend?

A specialist cardiologist will review your medical history and work with you to understand if you have less common risk factors for CAD. During your visit (60-75 mins), you will complete some questionnaires and measurements. Using dedicated guidelines, the cardiologist will ensure you receive optimal management and care as you continue to see your regular cardiologist.

How can I attend?

You will need a referral from your healthcare provider to be seen at the SMuRFless CAD Clinic. *There is no cost to attend.*

Location

- Level 4, Diagnostic Cardiology
Royal North Shore Hospital
St Leonards, NSW, 2065
- OR telehealth

Are you eligible?

- You have been diagnosed with CAD
or have a family history of CAD

AND

- You **do not** have high blood pressure,
high cholesterol and diabetes

AND

- You have not smoked in the past 12
months
